

AdvanFlow™

High performance transition portal

[More info](#)

Benefits

Full control of the stock in real time

Automatic direction detection

Self-correction of invalid movements

Characteristics

- High power RFID reader
- One high gain antenna
- Optional: Two satellite high gain antennas
- Optional: AdvanCloud software

What makes our portal unique

- High read rate, up to 100 items
- Advanced SW filtering with correction layer
- Easy integration with Keonn's AdvanCloud or 3rd party systems

Applications

- Tracking movement of goods inside stores: from stock room to store front, between stock rooms, between floors, ...
- Tracking goods entering and exiting the fitting room area
