AdvanGate-200 ™

RFID pedestals with
beam steering

Benefits

Minimizes false alarms

Continuous detection field

Very quick detection

Characteristics

- Multiple antenna beams
- Electronic beam steering
- Works with any hard and soft Gen2 RFID UHF tags
- Optional: AdvanCloud software

What makes our pedestal unique

- Loss-prevention and product identification in one system

- Small form factor, less intrusive than other anti-theft pedestals

- Provides data to detect which products suffer more theft attempts

Applications

- Loss-prevention at retail stores

- Loss-prevention at warehouses
